

# ASSEMBLY INSTRUCTIONS FOR THE UNIVERSAL STAND GORGEL FOR PANEL RADIATORS.

The universal stand should be mounted only to radiators type 22, 33 with a convector and the height of the radiators 300, 450, 600, 900 mm.

## Mount conditions:

depending on the size of the radiator, use two stands for the width (length) of the radiator 1500 mm, above the width of 1500 use three or more stands for the radiator

## Mounting method:

- loosen the upper cube (4) on the set screw (2) with an Allen key (12) and pull it out of the stand (6)
- loosen the lower cube (8) on the set screw (9) with an Allen key (12),
- Set the dimension of the lower cube at a height of 150 mm (see the drawing),
- Tighten the clamping screw (9),
- Place the radiator for mounting racks for easy assembly.
- Insert the racks between the radiator convectors,
- Fit on the bottom cube (8),
- Slide the radiator (4), positioning it with the fixed spacer plate (7) from the side of the radiator's wall plate (13), with the longer part of the foot towards the room
- Slide the spacer plate (5) as far as the stop.
- Tighten the screws (3),
- Put the radiator in the working position,
- Stressing the upper cube (4), tighten the clamping screw (3),
- Lift the stand base mask (10), draw the mounting holes
- After screwing the stand foot (11) to the floor, move the cover (10) to the stand base.

Item	Name	Q-ty
(1)	Pressure plate	2
(2)	Clamping screw	1
(3)	Screw	2
(4)	Upper mounting cube	1
(5)	Spacer plate sliding	1
(6)	Stand	1
(7)	Fixed spacer plate	1
(8)	Bottom mounting cube	1
(9)	Clamping screw	1
(10)	Foot guard	1
(11)	Stand foot	1
(12)	Allen key	1
